- Meets OSHA requirements by significantly reducing the amount of airborne particulate in your shop
- Designed to have a small footprint. This compact unit is the perfect size for small shops and shops with limited space
- It is the ideal dust extraction system for the woodworking industry and for other industries where fine fibrous airborne dust is a concern
- Innovative impeller design ensures a quiet operation
- The UB-1000V provides 604 CFM of airflow and the UB-1500V provides 775 CFM of airflow
- The cyclone separator system removes the particulate from the airflow before it enters the impeller
- The dust collector is mounted on casters. It can be easily maneuvered around the shop
- 6" suction inlet with "Y" connector with two 4" inlets
- The 20 gallon steel drum is mounted on casters so that it can easily be rolled away for emptying
- The Quick Lift lever allows the recovery drum to be easily removed by a single operator
- The recovery drum has a window on the side so you can easily see when the drum is full
- Poly liner recovery bag can be inserted in the recovery drum to facilitate emptying
- The final stage of filtration is a canister filter with 1 micron efficiency which prevents fine dust from escaping into the shop
- The canister filter is made of a pleated media and reinforced with steel mesh
- The flapper arm is integrated in the filter cartridge for manual cleaning. It helps to eliminate build-up that would otherwise reduce airflow
- UB-1500 shipping dimensions are as follows: 42" x 22" x 34". Weight 157 lb (1 box)
